

**WRC Plus Pack - Part 1**

Here we are for the first release of the new WRC's monsters!!! For now you can drive the Ford Fiesta WRC+, the Hyundai i20 WRC+ and even the VW Polo WRC+ that we saw in the late 2016 testing before the retirement of the team from the championship. So, as we aren't the FIA (that didn't released the approval due to bureaucratic problems), we decided to leave it to our users for offline and online mod.
